

Hauling oily chips is a messy job. The chips are coated with oil. The oil accumulates in a puddle at the bottom of the cart. And dumping the load can be a sloppy task.

Options available on the CECOR dumping container line makes this job easier. Chip carts can be fitted with a drain plug or flip-up screen to drain excess oil. Your scrap hauler pays more for dry chips.

Flip-Up Drain Screen

Drain screen located inside of the cart prevents chips and other larger particles from clogging drain hole.

- *Screen lifts up - cart cleans easily.*
- *Waste less coolant and recycle cleaner chips.*
- *Space saving design allows more room for chips.*
- *Feature available on all models, except L43 and L44.*

Drain Plug

3/4" Drain plug prevents fluids from escaping from drain hole. Remove plug to drain fluids. Loop Handle makes tightening easy.

- *Loop handle aids tightening.*
- *Handle stores on side of cart when draining.*
- *Feature available on all models.*

Trash Truck Options

Steel Cover

Hinged, galvanized steel cover controls mess and reduces fire hazard. Removes for dumping. Easy one person handling. Flexible, soft covers available for some models.

Card Holder

Sort and segregate trash for recycling. Insert card into holder to indicate contents. Change as needs change.

Tow Link

Hook up as many as 10 trucks for towing. Tow link folds up under dumping lip. Tow link is secured by spring retainer.

NOTE: Engineering specifications subject to change without notice.
